Introduction:

Hi.

My name is Enric Martin and I am currently studying a Degree in Web Application Development (DAW).

In my free time, following my passion for computers and technology, I started working as a freelance in part-time projects creating websites for different clients in a variety of areas including e-commerce, thematic blogs, e-learning, affiliate marketing, travel and tourism, using WordPress and other CRM/CMS systems.

After that, I decided to turn my passion into my future and study web development, where I am immersed in the use of technologies such as HTML, CSS, JavaScript, Node Js, Git and Github, VS code and new knowledge that I acquire every day.

Right now I want to continue learning from this fascinating world and gain the necessary work experience to take part in future projects.

If you want to know more about me or just to talk about your job offer, please just let me know, and I'll be glad to have a chat with you.

Kind regards.

- **Introduction to IT Course** - CodeCademy

Work Experience:

Factory Production Operator - Summer 2004 and 2005

During High School summer vacations in 2004 and 2005, I worked as a production operator in the Frit Ravich food factory, located in Massanet de la Selva. There, during Monday to Friday from 6 am to 2 pm, I performed various tasks in the process of production and packaging food products.

Electrician - Dates: 2006 - 2012

After graduating from the Technical school in Electricity and Electronics, I started from the base working as an electric technician, creating panels for factories and machines, installing them, assembling distributions and basically learning the ins and outs of the industry, to gain work experience and understand the fundamentals.

Freelancer - Dates: 2012 – 2016

During my experience as an electrician, I made some friends online who were working as freelance, traveling and living in other parts of the world. So I decided to start an online journey and learn how to earn a salary remotely.

My first gigs for clients were:

- Use my abilities with computers to create WordPress websites.
- Create, remove and modify HTML and CSS files.
- Upload and manage content to hosts.
- Installing additional tools like Cloudflare, Google Analytics, search console, SEO, etc.
- Translating documents, English – Spanish.
- Creating and developing content for a variety of customers.
- English and Spanish transcriptions.

Customer Service - Dates: 2017 – 2019

After my adventure as a freelancer, I got a proposition to work for a real estate company in Barcelona as a customer service manager. I received training to learn how to use their work system and integrate with the team. My role was to call the clients interested in the properties and offer them the possibility to visit it, arrange appointments with them, manage the agendas with the salesman and the propriety owners, fill a form with the clients needs and offer them similar apartments.

Cold call sales - Dates: 2019 – 2020

Developing my talking skills with the customer service at the real estate company, brought me to the field of cold call sales. The generous commission for every sale made, made me think that could be a better opportunity for me. Unfortunately, this was very different from the customer service job that I had before. It wasn't my cup of tea and I decided to quit after a few months.

Electrician - Dates: 2020 – 2022

In March 2020, the Covid-19 pandemic situation froze the world and shut down my future projects, making it difficult to keep working online. The manager of the electric company in Spain asked me to go back and work with them drawing electric circuits for commercial and residential buildings. Also I've played a big role in customer care service, taking calls from clients, solving problems on phone, reading and replying emails. Performing site evaluations for the client, managing cost estimations and running a small team for establishing electrical fittings, cabling and electrical management.

Warehouse Employee - Dates: 2022 – until now

Warehouse employee on an intensive schedule. A job that allows me to study in the morning and work in the Frit Ravich warehouse in the afternoon from 2:00 p.m. to 10:00 p.m. My job is to prepare orders for the company's customers.

Driving license:

- **Spanish license B:** Since 2005

Languages:

- **Spanish:** Native language
- **Catalan:** Native language
- **English:** High level
